**Re: Burlington Resources Oil & Gas Company LP
Response to 114 Information Request under the Clean Air Act
Facilities located within the Eagle Ford Shale**

Dear Ms. Kaleri:

Burlington Resources Oil & Gas Company LP respectfully submits the attached response to EPA's Clean Air Act 114 information request dated May 8, 2014. We appreciate EPA's agreement to extend our response deadline to August 15, 2014. Please note that Burlington, an indirect wholly-owned subsidiary of ConocoPhillips, is the owner and operator of each facility at issue and is in possession of all responsive documents and information.

Each request item is listed, together with our narrative response and a reference to the applicable attachments or other documents being provided in response to the request. In addition, Burlington objects to the request as follows:

- Burlington objects to the request to the extent it seeks "any and all documents" or words to that effect, as the definition of "documents" in the request is so broad that it would not be possible to assure compliance under a literal reading of this definition, and further any request for more than a defined universe of information would be unreasonably burdensome considering the zero or marginal value of any further information to EPA's investigation.
- Burlington objects to the request as it seeks information that is not reasonably related to Burlington's compliance with the Clean Air Act and associated programs.
- Burlington objects to the request to the extent it seeks information that is not in Burlington's possession, is in the possession of third parties, or both.
- Burlington objects to the request to the extent it seeks information that is legally privileged or confidential.
- Burlington objects to the request to the extent it seeks documents and information that are publicly available.

- Burlington objects to the request to the extent it seeks documents in EPA's possession or that were in the past submitted to EPA.
- Burlington objects to the request to the extent it could be interpreted to imply that EPA believes Burlington is out of compliance with Clean Air Act requirements.

ConocoPhillips and Burlington believe that we have provided all available, non-privileged information in our files in response to this request. However, if we locate additional information responsive to the request, we will supplement this response. If you have questions about this response, please contact Stephen G. Ellison or J. Scott Janoe at the contact addresses noted in the attached.

Sincerely,

Burlington Resources Oil & Gas Company LP
